#### STANDARDS OF QUALITY

STANDARDS OF QUALITY
Precess of painted glass that sway and tinkle in the breeze, assisted by a lite foreithourd Make in Japan label, tell the atory due to the atory distribution of the atory distribu

In attentional Linde?

But does the Japanese quality extend beyond painted glass, trinkets and geograms? Is the quality of Candian manufacture to be found in Japanese textiles, mokers' sundries or plumbing fixtures? A Tokyo from seeks business for the latter line in Canada.

We think the experience of most people has been that the quality is not to the found in the Japane seeks that is offered and a great that Japan is able to sell cheaper goods in Canada because the average monthly wage for a Japanese worker is \$41.90, as compared with \$35.347 or the average Canadian worker eagaged in manufacture.

the average Canadian worker engaged in manufac

But the real test is the old, old test of getting just what you pay for, and the test of Japanese goods is not price, but quality.

## Our Own and Other Opinion

"JAMMING" THE METERS . . . .

It would appear that there is more than one way of "jamming" the town's parking meters. Besides "jamming" the meters with off-colour coins, they can also be jammed with cars.

also be junited with ears.

Less Wednesder exceing on Kent Street a Lindsay citten was noticed returning to his car after attending the show and he was obviously ammed to find that the three-meter car parking area his car was in contained not three but four cars, one of them so close to his that his had to ester from the passenged the street of the s

authorities.

There are probably other ways of overcoming the difficulty but since it is caused primarily by the difficulty but since it is caused primarily by the difference in size between Camilian and English type care it has been suggested that one way of solving it would be solved to the solved to be solved to

#### WHAT ARE THE MOTOR CAR MANUFACTURERS CONTRIBUTING TO INCREASED SAFETYS

CONTRIBUTING TO INGREASED SAFETY?

We received our annual appeal from the Ontario
Safety League for a afe Civic Holiday weekend on the
roads of the province. This appeal is undoubtedly
worthy and should unquestionably be headed by all who
drive vehicles on public highways an indicturers contribunit to ask. What are made to the contribution of the contribution of

The average motor vehicle today is apable of the greater speeds than their counterparts of a fire years back and yet there is reason to but a proportion of the parties and their counterparts of the parties models. There have been some major important to the parties models. There have been some major mounted to the province of the pr The average motor vehicle today is capable of far

It is true that much depends primarily upon the driver and the actual mechanical condition of the vehicle being operated, but insit it also true that vehicle being operated, but insit it also true that manufacturers of these machines have a responsibility to provide a maximum of active features? What about speed, for example, in relation to a vehicle's general design and construction to say nothing of the known acts about speed in relation to them to a product which is created in the control of the construction of the control manuscurrer that right to this out a power water as capable of attaining speeds inconsistent with safety? And, finally, isn't it about time that highway authorities got down to brass tacks on the actual mechanics of highway safety insofar as motor vehicle construction is

#### DRIVE AT YOUR OWN SPEED . .

DRIVE AT YOUR OWN SPEED....
There is an undestrable campaign underway to have everyone who drives a motor vehicle drive at a high rate of speed. There is abo evidence that some of Ontario's police court magistrates are becoming accessories after the fact by fining drives who travel too alonly on the road. This, too, is an undestrable trend and both of these measures should be strongly opposed by the motoring public.

There is, in Ontario and Contract of the Contract of the

opposed by the motoring public.

There is in Ontario a maximum speed limit but we have no knowledge of a minimum speed limit and we fall to see why anyone should be compiled to drive at a speed not commensurate with their need or their dears. If anyone whiches to travel at a higher rate of speed than the driver ahead, the puns is on him for her) to pass at a safe time and drive on at any speed within the prescribed limit for the area.

Let's fight this high pression of the Nave very limit of the properties of t

one drive at a fast clip now before it gains further mo-

#### SO DON'T COMPLAIN ABOUT YOUR TAXES

Most people yell their heads off today about taxes and such. They should know what went on in the good old days.

good old days.

The Catholic Digest points out that fresh air and smillight were taxed in 17th century Bugland. The government collected from all housebolds with aix nor work windows. This tax wasn't repealed until 1851.

In those days it even cost money to hoast of your ancestry for there was an annual tax on famply create and coasts of arms. The Puritian spaid a weekly meal tax, giving up the price of one meal every general days of the control of the

The Romans, however, topped them all by having a tax on dying. They enforced it by prohibiting burial until the tax was paid. Historians don't say what happened if a survivor refused to pay. Peter the Great taxed everyone who wore beards.

taxed everyone who wore beards.

The most reasonable tax, however, was levied in Turkey in the 18th century. After a pasha had fined with a peasant he demanded "tooth money"—a tax to compensate him for the wear and tear on his teeth. compensate him for the wear and tear on

WARNING TO THE LIVING

WARNING TO THE LIVING
Drowning accidents in Canada are creating new
records this early in the summer holiday season. During
a recent sixteen-day period lifteen persons lost their
lives in the rivers and lakes of Algoma alone — a greatlives in the rivers and lakes of Algona alone — a great-er rotal than for all the rest of Datario in the same inter-val. A recent count of drownings in New Brinswick showed twenty-two deaths for the season to date, also a record total up to mile season is date, also also is high, and even the Pratine Province's report growing total. The comparison may be mapping with it would seem that our resort across the mapping with our highway systems for priority in a mid-summer death derby.

The really shocking thing about these drownings denis. The rest arise from carressness ato spundance. Children, adolescat and adults of both sexes are about evenly distributed in the statistics. Most of them are not chronically carcless in everything, mor archive generally read as being ignorant. They merely relax completely also show the statistics which is the same resolvent of the complete of the statistics of the same resolvent of the choice that they abanche for produced or behavior which presenves their lives from day to day in more fapilities.

illar surroundings.

This is not written as a stricture upon the unfortunate dead, but as a warning to the living who have their holidays before them. Each such death is a region of the sorrow of which we have a share. But we also deplore the increasingly obvious fact that so way persons of this day live so far apart from nature that they have lost their capacity for self-preservation when they get in, on or even near the waterways which are consecuted in the self-preservation is the second that division is the second that division is the Capacity for self-preservation summer. A father was on the advances of the Capaciting naminer. they get in, on or even near the waterways while a tre-one of the glories of the Canadian summer. A father played ball in a park white his small child padded near-by. It was a public park. Nothic good to a small child to But the child drowned. A youth in a small craft on the Cale lost it is pocketook overboard. If hid he and his friends known enough about boast is could have the control of the country of the country of the country of the small craft on the country of the country of the country of the small craft of the country of the coun

This and another incident led to a recommendation by a-coroner's jury that such craft should be inspected. haps regulations fixing engine power in relation to gth and weight of small pleasure boats would be re useful. There is always the question as to how more useful. There is aways use question as to low far the law should protect persons against their own folly. However, regulations setting general, minimum safety standards for small craft would be reasonable. But the greatest of safety measures is for holidays to take their natural gumption along with them when they go to water resorts. —The Globe and Mail.

#### SMART THOSE MOSQUITOES!

SMART THOSE MOSQUITOES:
Against the mosquito, man has gone about as far as he can go. He has studied their habits and their that does the billing. He has produced olist to cover their life histories and determined that it is only the female breeding places. He has concocted atomic diets so that when caught a mosquito can be tested with a geiger counter, not to show it alse can be mixed for urangement of the control of their con ium, but to show where she ate that diet and hence where she came from.

Man has fought the mosquito with every sort of

swatter from the Pharoah fan to the mule tail. He has swatter from the Pharoah fan to the mule tail. He bas devised lamps, sprays, and drenches, without number. Finally man has prepared lotions and ointments to be-daub his forehead and repel that agressive lady mos-quito; smelling like essence of ancient sturgeon, they

quito; smelling like essence of ancient sturgeon, tosy only repel people.

Solence has gone all out. The net result is that there are more mosquitos around than ever. Worse, like pioneers who have survived every sort of adversity, they are a tougher breed. They have an agility their forefathers or foremothers, never had. With evolution

neistakes or foremeliers, never had. With evolution has proteining the superformale, any day now one may develop with stingers at both ends.

The assorted powers and tainents of the lady mosquite deserve more study than they get. Every living ining, from base to bison, seem to go through yellow them, their numbers decrease. Not the mosquito. They not only get more numerous with the years but they get bigger and bitter.

With the same they have the same than th

set bisger and bitter.

With the years they have become more longwinded. The experts used to insist that the mosquito never travels more than a few hundred feet from her breading place. That's noneense. Any fisherman can remember how a mosquito suddenly appeared while he sat dishing in the middle of a two-mile wide mountain lake. That one inquisite saidy called her satiest. They had the call and did the mile out from shore in ten seconds are against a high wind at that. With the years, most-most place of the same than the same t

ses radar. In the black of the night she can come to a screened porch take an instantaneous bearing, and crawl into the one small crack in the entire netting, finding it as easily as a groundhog finds his hole. Worse, she has the magical power of getting in where there

finding it as easily as a grounding finds his hole. Norse, she has the majoral power of getting in where there isn't a single hole.

DIESELS....
The Lindsay division of the Canadian National

DIESELS...

The Lindesy division of the Canadian National Railways has taken delivery of its first diesel engine. It was promised during the last feetent election about a year ago that diesel shanding equipment, we have been to Lindesy at a reasonable sent of Lindesy at a reasonable sent die one sithough the promise was been died one sithough the control of many people.

When diesels were suggested for Lindesy the motivating idea was to overcome the much en uisance which for years has made painting houses within blocks of the railway yarde a painter's nightmare. But now that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has arrived it is at once supparent that the first diesel has a first diesel has diesel has a first dies

of description. One dissel does not remove all the smoke from a rallway yard and there are those who now wonder if the dissellation campaign was worth the effort after all. It is recognized, of course, that the long range plan of the CNA. It is to dissellate the entire system who putting a single dissel in service here and among the district of the course of the entire system who was the entire that the dissellation of the entire system who was the entire system and thave a system and the entire system and the entire system and the piece of machinery.

SMOKING VS. LIVING.

Due man who habitually smoked three packs of eigravites a day has quit. He is Dr. E. Cuyler Hamond, director of a reasench project for the American Cancer Society. He dropped cigarettes after noting the results of a statistical study involving 1877-66 men between the ages of 50 and 70. He and his associated found that in that group nosamokers had wives agreet lite expectancy as did heavy cigarette smokers. The desibled figures of the survey are so impressive they may frighten many eigravite smokers. Consider the state of the considered southing and desirable; now they will be more interested in getting rid of something proved to be toxic and undesirable. Pear is not the best motive, but I can a waken human to break easilaring habits.

It can awaken humans to break enslaving habits.

It can awken humans to break englaving habits. Chain smoking often appears to be as much a search for release from underlying emotional tensions as physical craving. Even where the victim thinks he gains satisfaction, it is no more than temporary and may merely cover up unsolvel problems which should have permanent asswers. Prevention is better than publicative. It would be wise to give more attention to pamatives. It would be wise to give more accention to removing the tensions and solving the problems. Thousands have proved that a craving for tobacco can be overcome. Often the first step has been a desire to drop it, the second a finding of deeper satisfaction in

We hope that many, persuaded now that fuller liv-ing is not to be found in smoke, will discover these other liberating facts. — Christian Science Monitor. BOORISH MANNERS

The unseemly discussion of the cost of bringing the Duchess of Kent and her daughter, the Princess Alexandra, to Canada to open the Canadian National Exhibition and, later, the Sir Adam Beck Generating Station, is a deplorable display of bad manners. No properly bred person invites a guest to visit and then property over present invices a guest to visit and then discusses with all the neighborhood the high cost of entertaining him, even to boast about it. The Duchess did not ask to come.... she was invited. It was an honor to the Exhibition and to the Hydro that she accepted to the examining and is the Payor that save accepted the invitation. In view of the comparisons made with the cost of entertaining other visitors for the same pur-pose, we believe she would be well within her rights to cancel the commitment.

If we cannot do these things with grace and court-esy, it would be better if we never did them at all. The prospect of interesting Royalty in other ceremonial enterprises in this country has undoubtedly been con-siderably dimmed. The bad taste of some people in this city is on exhibition daily. It is unfortunate that their bad manners have been revealed as clearly

-The Globe and Mail

SUPERIOR FUELS & SUPPLIES LIMITED

SURRENDER OF BRITAIN'S BASES

Following on the British agreement to evacu-ate Suez, the Greeks are pressing for the annexation of Cyprus and the South Africans for the return of Simonstown. Less pressing, but equally articulate, are the Spaniards who want Gibratiar and the Italians who eye Maita. There may follow agitation for the surrender of Aden on the Red Sea and Hong-Kong, off

surrence of Aden on the New Sees and Hollg-Foods, of the Chinese mainland.

Each of these bases is of great strategic importance. Cyprus dominates the eastern Mediterranean and is the new British Middle East beadquarters. Simand is the new British Middle East bendquarters. Sincontown is a naval base situated at the southern tip of Africa, equal in importance to Singapore. In time of Arrica, equal in importance to Singapore, in time of war it guards the alternative route to the Far East K, extracted the supreme importance of Malta, while Gibraliar is the control-key to the Mediterranean.

British is besset by two difficulties in considering the surrounder of these bases. Firstly were the promises made in wartime to consider subcommittee of the Singapore of Singapo

Atlantic Charter which guaranteed self-determination, It is no fault of Britain's that peace has not succeeded war, and that Communist imperialism has replaced Nazi war, and that Communist imperialism has replaced Nazi aggrandisment. Britain wishes to hold these bases now for the same reason as she held them during the ing the mobility of her fleet. America has established new bases around the globe for similar reasons—to protect the countries of the free world and to guarantee the mobility of her air force.

None of these bases should be surrendered un-

less the Powers which acquired them are convinced that stronger forces, under regimes as stable and singleminded as their own, will replace them.

TCP

# Re-powers Your Engine

TCP; a Shell-discovered fuel additive now blended into both Shell Gasolines, sets free the captive power formerly locked in by lead and carbon deposits. It's the greatest gasoline development in 31 years.

Acts so fast it repowers your engine before you've finished your second tankful.

Did you know that up to 15% of your engine's power is actually trap-ped . . . that you are paying for power you aren't getting?

power you aren't getting?

The reason is this: Every gasoline not today contains deposit forming compounds, And, as gasoline is burned, as gasoline the present of the combustion of the combustion chamber and on the tips of the gard plays. In the combustion chamber these deposits be accelerating, and set of the gasoline-air mixture before the piston reaches its proper firing position. These sense conceivating, and set of the gasoline-air mixture before the piston reaches its proper firing position. These sense is the content of the gasoline and the piston reaches its proper firing position. The piston is called pre-ignition and it not only waste power and fixed—it is also certain power to the content of the piston of the

These deposits also cause power loss y short-circuiting spark plugs, causing hem to misfire when you need power

SHELL GASOLINES NOW WITH TCP

The Greatest Gasoline Development in 31 years

against you.

By the time you have finished your second tankful, you'll be getting up to 15% more power. But remember—because these deposits are constantly building up, continued use of Shell

### To Our Friends of Lindsay and District,

It has been announced that we have sold the Building Supply section of our business.

This change in our operating policy has been under consideration for the past year: Our plan being to discontinus operating our Building Supply yard in favour of opening further Hardware Stores in other centres.

We would like to thank our many customers-for their patronage of our Building Supply business, also our Hardware business.

We are now concentrating all our efforts in the operation of our Hardware Store and would appreciate the opportunity of demonstrating to you our specialized service in paint, hardware, and related merchandise.

### Saving money... and writing cheques

If you write cheques frequently, you will like the many advantages of a Current account.

If your main purpose is to save, to accumulate funds, it's good to have a Savings account.

The money you leave in a Savings account earns interest, and your bank book gives you an up-to-date, continuing record of your financial progress. If your funds are active, with frequent deposits and withdrawals, a Current account provides a special service; a monthly statement, together with your cancelled cheques—useful as receipts and a ready reference for budgeting, bookkeeping and other purposes.
